Upon taking of possession, authority is requested to dispose of the building to the road contractor, by public auction, or by sealed bids. (September 2, 1970)

98 Right of Way - Route 78

There is presented the matter of moving cost reimbursement for the occupant of the five (5) room apartment situated in the property located on Route 78, Section 5F, Project: I-78-5-(5) from Lyons Avenue to Schuyler Avenue, Parcel 155.

The occupants, Mr. and Mrs. John Henry Bryant and their family were previously paid $20.00 as moving cost reimbursement based upon their occupancy of furnished rooms. It has subsequently been determined that they occupied a five (5) room apartment in which all the furnishings were their own personal property. They are, therefore, entitled to be reimbursed for their moving costs based on the room count schedule in the amount of $130.00.

Authority is requested to pay Mr. and Mrs. John Henry Bryant $130.00 plus a dislocation allowance of $100.00 less the $20.00 already paid for a total of $210.00. **(September 4, 1970)**

99 Right of Way - Route 287

There is presented again the matter of acquisition of property on Route 287 (1953), Section 9, Federal Aid Project I-287-2-(10), from Sandspring Road to Route 24. Condenmation proceedings were previously authorized on October 10, 1966 at which time the owners refused to state a demand. A complaint was filed and a court deposit in the sum of $51,450. was made on April 17, 1967.

Subsequently, the appraisals were updated to the complaint date and the Fair Market Value was re-registered in the amount of $77,400. Continued negotiations have resulted in the execution of an agreement as follows:

Parcels R50A, 2R50B	The Peck School (A New Jersey Corp.)	Consideration $88,000. Plus conveyance by the State of Parcels VX6B, and V6C, Route 287, Section 9, including court deposit of $51,450. previously withdrawn by the seller

The parcels have been appraised and the Reviewer's registered Fair Market Value Determination is $77,400. for Parcels R50A and 2R50B. The value of Parcels VX6B and V6C is $1,000. The variance is not substantial considering the fact that the State entered the property in August of 1965, and if this case proceeded to a hearing, an award and /or judgment could not be achieved substantially under this settlement, plus the fact that the owner would be entitled to some $11,500. in interest based on the difference between the registered fair market value and the court deposit; therefore, the agreement would appear to be in the public interest and approval is recommended.

It is further recommended that condemnation proceedings previously authorized be discontinued. Authority is requested to make payment to the owners in the sum of $36,550. representing the difference between the consideration provided for in the agreement and the amount previously withdrawn from court by the owners.

The Commissioner of Transportation does hereby determine that Parcels VX6B and V6C, Route 287, Section 9 are no longer required for use by the State of New Jersey in the improvement, betterment, re-construction, or maintenance of any State Highway. (September 4, 1970)

Right of Way - Route 18F

It is recommended that the bill for taxed costs in the amount of $100.00 be approved and paid to Jardine & Morrice, Esqs., attorneys for defendant. (September 4, 1970)

Right of Way - Route 20F

116 There is presented the matter of the Commissioners' award in the condemnation of property on Route 20F, Section 2, Parcel 256A-1, 256A-2 and 256B in the City of Paterson owned by Lillian Barr, et al.

At the hearing before the Commissioners', which was held on August 4, 1970 an award of $56,500.00 was granted. Fair Market Value was registered in the amount of $51,000.00 on February 13, 1970. The owners'offered testimony in the amount of $61,000.00. The State's witness testified to $51,000.00for the entire taking of an improved parcel. There was a deposit paid in court on December 31, 1970 in the amount of $46,000, there was another deposit paid into court on June 15, 1970 in the amount of $5,000, for a total deposit of $51,000.00 paid into court.

The State was represented by Fee Attorney Lewis L. Krieger, Esquire.

It is recommended that the award in the amount of $56,500.00 be approved and paid together with Lawful interest as computed by the Bureau of Titles.

No appeal is recommended since the Commissioners' award is fair and reasonable and the payment of the award is recommended as in the Public interest. (September 4, 1970)

Right of Way - Route 33

117 There is again presented the matter of the suit against the State in mandamus to compel condemnation, Docket No. L-15390-67. The owners contend that the State has constructed a curb and return on their property and the State contends that the curb and return is solely within the State and/or County owned property. The property involved is a strip along Corlies Avenue from 10 to 30 feet wide.

The County of Monmouth, a co-defendant, takes the position that it owns a 33 foot right of way; that, having done nothing, it should pay nothing. If, in fact, the State is wrong, the State will be required to buy, in addition to the lands in question, a sidewalk area. N.J.S.A. 20:1-35.

It appears that the owners have color of title by deed from their predecessor and prior interest in title. The question to be presented to the Court is one of a beginning point and survey to determine the location of the property in relationship to Corlies Avenue, Old Country Road and New Jersey Route 33. In the event that the factual contention of the State is rejected by the Court, the same will result in an extensive acquisition by the State, particularly as to damages to remaining improvements (Carvel Soft Ice Cream Drive-In).

At the commencement of trial, Judge Simmill suggested a compromise; namely, a payment of a lump sum by the State and the co-defendant, the County of Monmouth, for a quit-claim deed to the color of title to the property in question. After extensive negotiations and for purposes of settlement, the County agreed to make a contribution of $500 toward a total settlement of $2,000.

Accordingly, it is hereby recommended that the State participate in settlement of this litigation to the extent of $1,500 in exchange for a quit-claim deed without covenants to the premises in question. It is also recommended that the previous commission action in this matter drawn on September 30, 1969 and approved by the Commissioner on October 3, 1969, be rescinded. **(September 2, 1970)**

Right of Way - Route 40 & 322

118 There is presented here the matter of the commission award entered against the State in the condemnation of property on Route 40 & 322, Section 3, Parcels 10A & 10B owned by Abel Holding Co., Inc.

At the hearing before commissioners the State offered testimony in the amount of $840 for parcel 10A and $705 for parcel 10B which was the Fair Market Value in both parcels. The owners offered testimony in the amount of $25,380 for parcel 10A and $30,960 for parcel 10B. On parcel 10A the Complaint was filed on December 18, 1967 and a deposit in the amount of $840 was made on that same day. On parcel 10B the Complaint was filed on December 14, 1967 and a deposit of $700 was made on that same day. The commissioners returned an award in the amount of $20,550 for parcel 10A and $19,933 for parcel 10B.

It is, therefore, recommended that the commissioners' awards in the amounts of $20,550 for parcel 10A and $19,933 for parcel 10B be appealed. **(September 4, 1970)**

SEPTEMBER 8, 1970 32 NO. 38 - 1970

119 Right of Way - Route 78

There is presented here the matter as an attempted appeal by the State from an award of $21,000.00 against the State in the condemnation of property on Route 78, Section 4C, Parcels 72I and 79C, owned by St. Mary's Church, Watchung.

The complaint was filed on May 14, 1968. A deposit was paid into Court on May 14, 1968 in the sum of $6,250.00 and on June 17, 1970 an additional deposit of $8,750.00, making a total deposit of $15,000.00. The State's Fair Market Value was re-registered in the sum of $15,000.00.

Although a Commission Action dated December 17, 1969, approved by the Commissioner January 23, 1970, recites that a protective appeal has been filed, no appeal was filed within time and the Court on motion refused to permit the State to file a notice of appeal as within time.

Approval is therefore requested to pay the award of $21,000.00 together with lawful interest as computed by the Bureau of Titles

The State was represented by Fee Attorney John F. Cannon, Esq.

Route 62
Bridge Over Passaic River

9 The bridge carrying Route 62 over the Passaic River between Totowa and West Paterson, commonly referred to as the Hillery Street Bridge, was constructed in 1898 and came under the State's jurisdiction in 1920. The structure is a four-span steel through Pratt truss bridge with an overall length of approximately 361 feet and a 17'-6" roadway width. The deck consists of timber planking supported on a steel floor system.

Since coming under the State's jurisdiction, the bridge had been posted for a maximum load of 12 tons. However, in 1968, as a result of an inspection-in-depth, the bridge was posted for passenger vehicles only, precluding its use by trucks and buses.

The timber planks of the deck continually became loose and our maintenance forces periodically nail the planks down and replace planks as necessary. It has become increasingly evident that attempting to keep this bridge safe and serviceable, even for passenger vehicles, is an exercise in futility. Because the bridge is so antiquated, it does not lend itself to any economical permanent restoration.

In view of the foregoing, it is recommended that the Route 62 bridge over the Passaic River be closed down to all traffic and eventually demolished. Passenger vehicles which have been using this bridge will be able to cross the Passaic River via a recently constructed County bridge at Glover Avenue which is less than 0.4 of a mile from the Hillery Street bridge.

There is presented herewith a proposal providing for the demolition of a large masonry factory building including all appendages and garages which are located on Route 280, Section 8, Project #I-280-6-(34) from Passaic River to Jersey City and Newark Turnpike, Parcel 1.

The subject property was acquired by the Right of Way Division, upon request, as an advance acquisition to forestall construction which was under way.

The Department has received numerous complaints from the City of Harrison Police, Fire, Health and Administrative Officials concerning the extensive vandalism in the subject property resulting in a very hazardous condition. Department of Transportation representatives have inspected the subject property and have confirmed that the buildings have been extensively damaged. The City of Harrison Officials maintain that the materials removed from the buildings, as well as the damage incurred by the structures, have created so dangerous a situation that it is considered an emergency and it is imperative that the property be demolished expeditiously.

In accordance with Departmental Operating Procedure No. 3.106 and State requirements, the Commissioner of Transportation, John C. Kohl, has informed the Treasurer by letter dated August 17, 1970, copy attached, that an emergency exists and has requested authority to arrange for the demolition of the property which is considered hazardous by reason of vandalism and health reasons.

Concurrently, the Assistant State Highway Engineer and the Regional Engineer have secured the attached proposal from V. Ottilio and Sons, Contractors, which firm is listed with the State as qualified demolition contractors, for the demolition of the subject structures in accordance with standard State procedures covering demolition and any necessary backfill of foundations. The total basic amount of this contract is $24,500 and said amount is considered reasonable for the work to be accomplished by the Regional Engineer's Staff.

The matter is submitted to the Commissioner with a request that the proposal be accepted and authority be granted to notify the contractor of the acceptance and to authorize him to begin work immediately that the Treasurer's Office informs the Commissioner of his approval of authority to waive advertising by reason of the subject emergency.

The remainder of the structures on this project will be demolished as they become vacated by a separate contract to be prepared by the Design Division which will be advertised in the usual manner as soon as is possible with a contract being awarded after the legally required advertising time has expired. **(September 15, 1970)**

Services - Engineering
Route 7
Hardesty and Hanover

12

Our agreement with Hardesty and Hanover of July 1, 1968 in connection with the improvement of Route 7 contemplated a scope of services approximating $5.7 million dollars. It has now become evident that the scope of services, utilizing the same unit prices pertinent to the initial negotiations, has been increased. The estimated cost of the project for renegotiation purposes is now $11 million dollars (the cost of the project utilizing todays prices is in excess of $17 million dollars).

The scope changes are a direct result of the increase in the size of the bridge over the Erie-Lackawanna Railroad. The original plan would have required fills about 50' high which was later determined to be "impossible" to construct in the meadows. In addition, the bridge was widened.

To properly reimburse the Consultant, the following increases are required:

Direct Salaries--

From a ceiling of $336,000 to $486,000, an increase of $150,000

Reproductions--

From $7,000 to $10,000, an increase of $3,000

Contingencies--

From $19,000 to $40,000, an increase of $21,000

All other items remain as is.

It is recommended that the aforementioned total of $174,000 be set up, which will raise the ceiling from the present $390,000 to $564,000. **(September 17, 1970)**

Claims - Settlement

3 **The Department of Transportation is carrying a claim against Richard Murrell in the balance of $409.19 arising out of an accident occurring on January 17, 1960. As the result of said accident, bridge railing on the Beach Thorofare Bridge was damaged, as the result of having been struck by a vehicle owned and operated by Richard Murrell and had to be repaired at a cost of $459.19.**

This debtor reduced this bill to the sum of $409.19 by periodic installment payments, the last payment having been received on November 22, 1965. Suit was therefore instituted against this debtor in the Cape May County District Court for the balance remaining on this debt by the Claims Bureau.

I am attaching, hereto, communication received from the Office of the City Clerk for the City of Ocean City with reference to Mr. Murrell's annual salary, as well as, the number of his dependents. Subsequent to our filing suit, we received communication from the Public Defender's Office, a copy of which is attached, hereto, and is self-explanatory. This file was discussed at the time of the offer with counsel to the Department of Transportation who felt that in view of the financial circumstances of the defendant, as well as, the time and cost involved to try this case, the Department would be justified in accepting the proposed offer.

Giving due consideration to all the circumstances involved in this matter, it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the approval of counsel for the Department of Transportation that the offer of settlement in the amount of $50.00 receive favorable consideration and be approved.

Parcel E275B	Hess Realty Corp. (A Delaware Corp.) Plus $2,954.12 upon execution by the seller and delivery to the State of a General Release for claims regarding a drainage problem separately caused by the State's construction.	Consideration	$250.00

This parcel has been appraised and the Reviewer's registered Fair Market Value Estimate is $250. The amount to be paid for the drainage release is based on an estimate and study submitted to the Right of Way Division by memorandum dated March 13, 1970 prepared and signed by Joseph R. Cunningham, Assistant State Highway Engineer. It is recommended that this agreement be approved.

The construction of an improvement to the subject highway necessitated the acquisition of a slope easement. At the time of construction, the Right of Way Division negotiated for and the Commissioner approved an agreement covering the slope easement which subsequently was consummated and the owner paid.

After the highway was constructed and the contractor was off the job, the Engineers found that there was an unanticipated drainage problem which caused a flooding and ponding of the owner's property as a result of the highway construction. The Engineers established the subject parcel for the construction of an inlet on the owner's property to resolve the drainage problem.

Referring to Mr. Cunningham's mentioned memorandum of March 13, 1970, the inlet did not fully alleviate the problem and additional engineering work, which the State's engineers estimated would cost $2,954.12, would be the cost to cure the problem through further construction.

At the request of the State's engineers, the subject agreement has been secured compensating the owners $250 for the land and rights needed for the State to construct the inlet and $2,954.12 to be paid to the owners as a cost to cure the drainage problem with the understanding that they will undertake the necessary work and release the State from all future claims. According to the Engineers, the State could not perform this work as a change order by reason of the fact that the contractor was off the job.

Authority is requested to rescind the commission action of September 11, 1968 approving the institution of condemnation proceedings.

Authority is also requested to withdraw the State's Fair Market Value estimate of $150 from the Superior Court in order to make payment to the owner. (September 22, 1970)

Resurfacing Detour Roads
Route 17, Section 4A

9 It is recommended that permission be granted to the Division of Local Government Aid to include some repairs to construction detour roads in a contract being prepared by the Borough of Moonachie, Bergen County for the improvement of Joseph Street, Moonachie. This repair work comprises the resurfacing of Union Street and Concord Street in the Borough of Moonachie and the resurfacing of Anderson Avenue in the Boroughs of Moonachie and Wood-Ridge, all in Bergen County. It is further recommended that $8000 of Construction funds (612 account) be earmarked to reimburse the Borough of Moonachie for payments it makes to its contractor for the resurfacing of Union Street, Concord Street and Anderson Avenue. These streets were used as a detour for Route 17 during construction of Route 17, Section 4A. The detour was established by Commission Action dated October 31, 1967. The contractor for Route 17, Section 4A completed his contract and left the job site before these streets could be made available to him for repairs. It is considered impractical to reopen his contract to make these repairs and this alternate method is therefore recommended. **(October 6, 1970)**

On October 20, 1969, the Commissioner granted authority to institute condemnation proceedings for Parcel L34D and also to file a declaration of taking and to deposit in the Superior Court the State's fair market value estimate of $20,300., due to the fact that these owners were unable at that time to clear title because of the existence of an agreement of sale on the property.

The engineers have now advised that the area of proposed taking has been reduced and the parcel is now designated as LR34D. As a complaint and declaration of taking have been filed and a deposit made into Court, it will be necessary to re-appraise the premises and secure the owner's consent to abandon part of the proposed taking.

The owner's attorney, Herbert L. Shapiro, has advised in writing that his client consents to the proposed partial abandonment and will agree to an amendment. The reason for the owner's request is so as to permit him to utilize the property pending accomplishment of State's re-appraisals.

Condemnation proceedings were previously authorized on July 16, 1969 at which time the State's registered Fair Market Value of $2,200. was offered to and refused by the owners whose demand of $10,000. was considered excessive.

Subsequently, an appraisal updating to the date of complaint resulted in the Fair Market Value being re-registered in the amount of $2,500. which was offered to and refused by the owner who stated a reduced demand of $6,500. which is still considered excessive.

Authority is requested to deposit an additional $300. with the court which when added to the amount of $2,200. previously authorized for deposit will equal the re-registered Fair Market Value of $2,500. 83 There are presented report and appraisal with map and description on Route 20 Freeway, Section 2, From Route U.S. 46 Interchange To Main Street; Parcel 309 plus remainder, P. & C. Realty Co., Inc., A N. J. Corp.

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel and the damaged remnant in fee simple, subject to any public utilities existing in the premises.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $113,700.

Condemnation proceedings were previously authorized for Parcel 42 on July 20, 1965. A complaint was filed and the sum of $46,600. was placed on deposit in Superior Court. On February 17, 1967 the owners withdrew this deposit from the court.

Subsequently, Parcel 42 was revised to Parcel R42 and negotiated along with Parcel R41 which is in the same ownership. Condemnation proceedings were authorized for these parcels on June 14, 1968 and authority was granted to deposit an additional $30,800. in court. However, this additional sum was never deposited.

The appraisals have been updated to the date of complaint and the Fair Market Value has been re-registered in the sum of $121,900., which was offered to and refused by the owner who demands $175,000. Authority is, therefore, requested to deposit the additional sum of $44,500. which when combined with the $77,400. previously authorized for deposit will make a total of $121,900. (October 7, 1970)

The State's representative inspected the housing on September 30, 1970, and certified that the replacement housing is decent, safe, and sanitary.

The down payment has not been made.

In attempting to close title in accordance with the agreement, the Title Search disclosed that there are outstanding interests in this property, an open mortgage, as well as litigation concerning the property which is presently pending in the United States District Court. The Title Bureau advised the reputed owner of record of the foregoing in an attempt to have them clear their title. The owners have advised in writing that they will not contest condemnation proceedings nor attempt to introduce alue testimony in excess of the States's Fair Market Value.

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of Parcel 29A and X29B in fee simple, subject to any public utilities existing in the premises and that the previous action of December 22, 1969 granting approval of the purchase agreement in the sum of $12,500 be rescinded.

Upon taking of possession authority is requested to dispose of the 2 story dwelling to the road contractor, by public auction or by sealed bids.

The State's Registered Fair Market Value Determination of $21,400 was offered to and refused by the owners who refused to state a demand at this time.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the Taking of Possession and use thereof by the Department of Transportation, authority is requested to then file a Declaration of Taking and to deposit with the Superior Court $21,400.

There is presented again the matter of acquisition of property on Route 76, Section 1, Federal-aid Project I-76-8-(12), From Benjamin Franklin Bridge to Kaighn Avenue. A purchase agreement in the sum of $3,400 was approved for Parcel 902 owned by Mildred Edmonds, widow, on November 14, 1968.

Our Title Bureau has now advised that there are numerous liens filed against this property which are far in excess of the agreed upon consideration and that the owner is unable to close in this matter.

Authority is therefore requested to rescind the agreements and the Commission Action of November 14, 1968 and to institute condemnation proceedings in fee simple subject to any public utilities existing in the premises.

Prior to the ultimate fixing of compensation, should any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court the registered fair market value of $3,400.

Authority is also requested to file suit against Mildred Edmonds, widow, for the recovery of the down payment of $850 previously made. Right of Way - Route 76

91 There is presented again the matter of acquisition of property on Route 76 (1953), Section 1, From Benjamin Franklin Bridge to Kaighn Avenue, Parcel 941. On October 9, 1969 the Commissioner approved a purchase agreement executed by Jules M. Kahaner, Administrator of the Estate of Nora Jetter Torrence, deceased, in the sum of $1,500 which represented an administrative settlement of $600 over the State's fair market value of $900. This administrative settlement was deemed to be in the best interest of the State.

Our Title Bureau has now advised that they are unable to confirm the death or the Estate of Nora Jetter Torrence; nor can they determine who may be her heirs or have an interest in the property.

Authority is therefore requested to rescind the agreement approved on October 9, 1969 and that condemnation proceedings be authorized to acquire this parcel in fee simple subject to any public utilities existing in the premises. Prior to the ultimate fixing of compensation, should any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $900.

5 Claims - Settlement

The Department of Transportation has a subrogation claim against Joseph F. Cugini and Donald W. Ring in connection with personal injuries suffered by Frederick L. Shill, Jr., District Superintendent, District #3, arising out of an accident occurring on March 8, 1967 involving a vehicle owned by Joseph F. Cugini, being operated at the time by Donald W. Ring. As the result of said injuries sustained by Mr. Shill, the Department of Transportation expended the sum of $172.65 for medical treatment and prescribed medications, and $1,100.00 representing a 5% permanent disability award entered by the Division of Workmen's Compensation.

This employee retained the services of an attorney to start a suit against the third party involved. Inasmuch as this employee lost no time from his employment and the medical bills were rather small, the attorney experienced some difficulty with the insurance carrier representing the third party in arriving at a settlement figure. Also, inasmuch as the treating physician was extremely busy and reluctant to come to Court and testify, this also weakened the attorney's position in arriving at a settlement. Subsequent negotiations resulted in the insurance company agreeing to pay the sum of $1,250 in full settlement of this claim.

For the foregoing reasons, the attorney felt it advisable to accept the proposed settlement of $1,250. After deducting the statutory allowances for counsel fees and expenses of suit, the State would be entitled to receive the sum of $757.49. Mr. Shill's attorney requested that the State accept the sum of $500.00 in full settlement of its claim so that his client could receive $257.49 as his share of the third party settlement. I am enclosing, herewith, copy of the attorney's letter dated June 29, 1970 which outlines his reason for making this request.

Giving due consideration to all the circumstances involved, we feel the attorney's proposed offer of settlement in the amount of $500 net to the State is reasonable and it is our recommendation that it receive favorable consideration and be approved and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of the Deputy Attorney General for the Department of Transportation. (October 27, 1970)

6 Claims - Settlement

The Department of Transportation is carrying a claim against James Gilpin and Florencio Betancourt in the amount of $661.74 arising out of a two car intersectional accident, occurring on August 11, 1968 at the intersection of Route 70 and Cornell Avenue, Cherry Hill, New Jersey. As the result of said accident, traffic signal equipment was damaged and had to be repaired at a cost of $661.74.

The insurance carrier for one of the parties involved offered the sum of 50% as they did not feel their insured was entirely to blame for the accident. This offer was rejected. Subsequent negotiations by the Claims Bureau with the carrier has now resulted in their offering the sum of 75%, or the sum of $496.30 in full settlement of the State's claim. The Claims Bureau endeavored to recover the other 25% from the second vehicle involved, but have been unsuccessul to date in getting any reply.

The offer of 75% was discussed with counsel to the Department of Transportation who felt we should accept this sum rather than go to Court for the sum of $165.44, as it would undoubtedly cost the State this amount to prepare the case for trial and produce the necessary witnesses.

It is therefore our recommendation that the sum of $496.30 be accepted in full settlement of this claim for the reasons set forth above and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of the Deputy Attorney General for the Department of Transportation. 74 There is presented again the matter of condemnation of property on Route 3, Section 1, from Eighth Street to Route 20, covering lands of Harlin Investment Company, et al, formerly Industrial Sites, Inc. The matter of condemnation of this owner's property first entered the Courts during the year 1965 when the former owner filed a Complaint in Superior Court of New Jersey mandamusing the State to condemn property claimed to be owned by them and which the State contended was tideland. It was not until March, 1970, that the Department of Environmental Protection established the mean high water line of Berry's Creek, thereby denoting that the owners had undisputed title to fastlands designated as Parcel 11D2 and that the Department of Environmental Protection claimed ownership to the lands designated as Parcel T11D1.

On May 6, 1970, Theodore Trautwein, Judge of the Superior Court ordered that the State of New Jersey institute condemnation proceedings for the acquisition of Parcels 11D2 and T11D1, the owners also claiming title to Parcel T11D1. As a result thereof, condemnation proceedings were authorized for the acquisition of these two parcels and a Complaint was subsequently filed with the Clerk of Superior Court. Subsequent thereto, this office was informed by the Division of Law that the Court has since directed that an amount of money representing the Fair Market Value for the fastlands (Parcel 11D2) be deposited with the Clerk of the Superior Court at this time.

The registered Fair Market Value for Parcel 11D2 being $69,300.00, it is requested that authority be granted to deposit with the Clerk of Superior Court $69,300.00 in compliance with the Court's direction, with the understanding that negotiations in the regular manner will be conducted in an effort to reach an amicable settlement. **(October 21, 1970)**

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $850.

It is further recommended that the complaint, filed on March 20, 1969, be amended to substitute the map and description for Parcel R117B in place and instead of those previously filed.

Inasmuch as no court deposit was made for Parcel 117B, authority is requested to deposit an additional $625. with the court which when added to the amount of $375. previously authorized for deposit will equal the re-registered Fair Market Value of $1,000. **(October 20, 1970)**

Foreclosure was started by the mortgagee and, at the request of the Legal Division, foreclosure proceedings were delayed pending departmental action.

It is recommended that title be closed with the State paying such amounts in excess of the down payment as may be necessary to clear the liens on the premises.

52 There is presented the matter of a Dwelling Lease Occupancy Agreement for the dwelling located on Route 76, Section 1, Federal Project I-76-8-(12), from Benjamin Franklin Bridge to Kaighn Avenue, Parcel 476B.

Authority is requested to rent the dwelling to the family of Mr. Otis Reeves for a rental of $87 per month based on the terms and conditions set forth in the Dwelling Lease Occupancy Agreement, Rent Account Number 76-1-476B-1.

It is normally our procedure to substantiate the proposed rental by surveying the market for comparable rental properties and arriving at an indicated figure in that manner. However, after an exhaustive survey of the market, there are no comparable rental properties to utilize as a guide in setting the rental. In these cases, a yearly return of 10% of the Fair Market Value is considered fair and reasonable to the State, thus the rental in the amount of $87. In our opinion, the $87 per month rental is fair and reasonable.

Authority is also requested to close title subject to the lease occupancy. (November 2, 1970)

Since this unit is a single-family owner occupied dwelling, a rental factor of 10% of the acquisition price was used in lieu of comparable rentals. Consideration has also been given to the fact that the owners will oversee the property in the nature of general appearance and security. They will also provide their own heat, water, gas and electric. It is our opinion that this monthly rental is fair and equitable.

The parcel has been appraised and the Reviewer's registered Fair Market Value Determination is $7,200. Both the Legal and Right of Way Divisions agree that since the case is over two years old that legal costs and interest due the owner would exceed the variance. Therefore, the agreement would appear to be in the public interest and approval is recommended.

It is further recommended that condemnation proceedings previously authorized be discontinued. Further authority is requested to withdraw the deposit heretofore made into the Superior Court. (November 8, 1970)

(November 8, 1970)

Right of Way - Route 18 Freeway

69 There is presented again the matter of acquisition of property on Route 18 Freeway, Section 8, From Route U. S. 9 To Route 79. Condemnation proceedings were previously authorized on July 17, 1970, at which time the State's Suggested Settlement was offered to and refused by the owners whose demand of $500. for each year or part thereof that the easement is in force, was considered excessive.

Continued negotiations have resulted in the execution of an agreement as follows:

Parcel E96B Rocco Salvest, Executor, Rose Salvest Mikal & Anthony Mikal, h/h, Mildred Harris Cafaro, widow, Aldona Vojvoyda Strohsahl & George H. Strohsahl, h/h, Giademes Salvest & Anne Salvest, h/w, Heirs at Law Under the Last Will and Testament of James Salvest, deceased. Consideration $350.

There is presented again the matter of acquisition of property on Route 21 Freeway, Section 4, Federal-aid Project U-126-(18), from Route 3 to Monroe Street. Condemnation proceedings were previously authorized on October 9, 1968, as the owner's demand was considered excessive.

Subsequently, the appraisals were updated to the complaint date which resulted in the Fair Market Value being re-registered in the amount of $113,100. Continued negotiations have resulted in the execution of an agreement as follows:

Parcels 189A & 189B	Housing Authority of City of Passaic	Consideration $125,000.

The parcels have been appraised and the Reviewer's registered Fair Market Value determination if $113,100. This is a partial taking from a large public housing complex with the owner being the United States Government. The settlement appears to be fair both to the State and the Federal Government as the variance is within a reasonable range of the Fair Market Value. If the case continued in litigation it would have to be tried in the Federal Court as the State has no jurisdiction in this matter. Further damages would be a major point of contention as the taking is close to the large apartment structures and a verdict would probably be in excess of this proposed settlement. It is recommended that this agreement be approved and the condemnation proceedings previously authorized be discontinued.

Further authority is requested to withdraw the deposit of $84,800 heretofore made into the Superior Court under Declaration of Taking.

It is further recommended that authority be granted to dispose of the site improvements to the road contractor by public auction or sealed bids.

An agreement was approved by the Assistant Commissioner, Highways, in the above captioned matter on August 18, 1967.

Prior to closing by the Title Bureau, the owners requested a stake-out which brought to light that a 3-car garage was encroaching on the Right of Way. This encroachment was not indicated on the parcels map when the property was appraised. After reviewing the file it was determined that it would be in the best interest of the State to re-negotiate a settlement based on the original appraisal.

Continued negotiations have resulted in the execution of an agreement as follows:

Parcel R59A	Norman V. Herms & Katherine B.,h/w	Consideration	$71,800.
	Less allowance to the State Owner to retain & remove 650 ft. of cyclone, fencing 3 kitchen cabinets, 3-car garage		$ 480.

Inasmuch as a deposit has not been made with the Superior Court, no request for authority to withdraw is necessary. (November 8, 1970)

76 Right of Way - Route 35

There is again presented the matter of acquisition of property on Route 35 (1953), Section 6, Asbury Avenue To Eatontown. Condemnation proceedings were previously authorized on January 15, 1970 as the owner's demand was considered excessive.

There is presented the matter of the Judgment entered against the State in the condemnation of property on Route 21F, Section 4, Parcel R193, in the City of Passaic, owned by Public Service Electric and Gas Co., a corporation of New Jersey; et al.

At the commission hearing, the commissioners' award was in the amount of $485,000. The State appealed. The State was represented by Fee Attorney Robert Tessler.

At the jury trial, the property owner testified in the sum of $573,600. The State offered testimony in the sum of $324,000. The fair market value was reregistered in the sum of $332,600. The sum of $249,000 was deposited into court on April 30, 1969.

The jury returned a verdict in the sum of $420,500.

A review of the file indicates both to the undersigned and to Assistant Attorney General Stephen L. 191 Right of Way - Route 78

There is presented here the matter of the commission award entered against the State in the condemnation of property on Route 78, Section 5G, Parcel E761 owned by Lowman Hagins, Jr.

At the hearing before the commissioners the State offered testimony in the amount of $300 which was the registered fair market value. The property owners appeared and requested that the State take the entire property. It was explained that this was impossible and the owners refused to state a monetary demand. Complaint was filed in this matter on March 24, 1970. There has been no deposit with the court. The report of commissioners was in the amount of $500.

It is, therefore, recommended that the commissioners' award in the sum of $500 be approved and payment of this sum be made. Although this sum is $200 in excess of our fair market value, the cost in terms of time and fees dictates that no appeal be taken. Since there has been no entry by the State and the property owners were left undisturbed in their enjoyment of the property, no interest is due on the award. (November 13, 1970)

There is presented the matter of moving cost reimbursement for John Kardoulias, T/A Peacock Diner, previously located on Route 3, Section 3, Project # U-186-(18), from Passaic River to Route 20, Parcel RT100B.

The occupant was requested to submit two estimates for his business relocation. Since the estimates received were in excess of $5,000, the State obtained a third estimate as required. Due to the extenuating circumstances involved in this relocation, the State secured an additional estimate to support the previous one.

The fourth estimate was submitted by the Fodero Dining Car Company in the amount of $36,960. The estimates were reviewed and it was determined that the estimate submitted by Fodero Dining Car Company was reasonable. This is based on the fact that the estimate indicated a more realistic approach to the cost of relocating the diner and itemized the various steps and procedures that would be necessary in relocating a diner of this type. The estimates submitted by the occupant were in excess of $70,000 and included items of construction which could not be reimbursed.

Fair Market Value was established in the amount of $29,000.00; the complaint was filed on November 13,1969, and no deposit was made. The award was in the amount of $31,000.00

The State was represented by Fee Attorney John A. Hila.

It is recommended that the award in the amount of $31,000.00 be approved, since it exceeds the State's Registered Fair Market Value by less than 10 per cent, the State could not do better on appeal and it would be in the best interest of the State to accept the award. It is further recommended that the payment in the amount of $2,000.00 being the amount over and above the State's Registered Fair Market Value be paid together with lawful interest as computed by the Bureau of Titles. It is further recommended that since the State's building and equipment appraisal is higher than that of the owner and since there may be some possibility that a very expensive bailing press which the State is acquiring may be disposed of to the owner, serious efforts be made to settle the case. Claims - Settlement

1 The Department of Transportation is carrying two claims against McAllister Towing Company arising out of accidents occurring at the Victory Bridge on December 30, 1967 and March 24, 1968. As the result of said accidents, the fender system at the Victory Bridge was damaged and had to be repaired by contract at a total cost of $39,301.00.

Upon presenting the Department's bill, the Towing Company made an offer of settlement in the amount of 50% which was promptly rejected. The Towing Company during subsequent negotiations, indicated that their Captains disclaimed causing all the damage for which we were billing, contending that many vessels pass through the area and could have caused some of the damage for which they were billed. We assured the Towing Company that this was not so as a very accurate record is kept of every accident occurring at the Victory Bridge and the responsible party is charged only for the damage they cause.

The Towing Company raised the question of the long delay in making repairs between the date of the accident and the date actual repair work commenced. Bids for the fender repair at the Victory Bridge were received on January 23, 1969. They pointed out that labor and material charges between this period of time increased considerably. McAllister indicated labor increased 25% and materials 35% and felt this should be taken into consideration in arriving at an amicable settlement. Using 30% as an average figure, McAllister felt that our claim should be reduced by this amount, plus an allowance for depreciation. Using the Towing Company's figure of 30%, plus 10% depreciation allowance, the Towing Company offered the sum of $24,759.63 in full settlement of our claim.

The Bridge Division officials contacted the New Jersey Association of General Contractors and ascertained that labor increased 17% during this period of time and materials approximately 10%. Using the weighted price method that labor is 75% of the cost and materials 25%, we arrived at a rounded figure of 16%. Using this figure, as well as, a 10% depreciation allowance, we countered with a figure of $29,711.56. After much discussion, the McAllister Company agreed to meet us half way between their figure and ours which amounted to $27,259.63. As a last effort to increase this figure we asked that they round out their offer to $27,500 which McAllister Company agreed to do.

In addition to the two cases, heretofore, mentioned, we also have twelve other claims against McAllister for lesser amounts totaling $9,040.36. These twelve claims were settled for the sum of $8,149.79, the difference being a depreciation allowance in each claim. It was pointed out by McAllister Towing Company, during our negotiation, that if the two larger claims could not be settled without litigation, we would also have to start suits on the remaining twelve smaller claims.

Giving due consideration to the time and cost which would be involved in preparing cases for suit and producing the necessary expert witnesses and bridge personnel, we feel the offer of settlement represents a fair and reasonable approach and it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the approval of Deputy Attorney General David Beiderman that the offer of $27,500 receive favorable consideration and be approved.

77 Right of Way - Route 3

There is presented again the matter of acquisition of property on Route 3, Section 3, Federal-aid Project U-186-(18), Passaic River to Route 20, Parcels RT100A and RT100B, The Council in the Division of Resource Development of the Department of Conservation and Economic Development, in which condemnation proceedings were previously authorized on December 12, 1968, and on December 20, 1968 a Complaint was filed and a Declaration of Taking together with a deposit of $1,868,500.00 was made into Court.

Due to the meadowland riparian litigation and legislation, the affected properties were, in effect, unmarketable and legal direction resulted in condemnation being instituted as one massive suit covering the two parcels. All "claimants" as well as tenants and other interested parties totaling 92 were joined in the suit as defendants.

Subsequently, the Department of Environmental Protection (formerly the Department of Conservation and Economic Development) depicted a line it now claims as the limits of the riparian areas. This action abandoned the State's claim to a substantial section of the subject meadowland areas.

By an Order dated May 29, 1970, Superior Court Judge Trautwein directed the Department of Transportation to revise the initial suit so as to condemn by area of each individual owner and/or claimant. This involved 31 new parcels. The Order also required that new appraisals based on the new upland ownership conditions be accomplished.

One of the designated new parcels is Parcel 2R100B6B in the name of Bergen County Associates, Inc., a partnership of New Jersey, to which the Court allocated the sum of $51,835.00 in an Amended Order for Payment into Court, and further assigned to this parcel a Trial Court Calendar Control Number of C-5D. This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $97,800.00. Concurrently with the drawing of this commission action, this Fair Market Value of $97,800.00 is being offered to the owner by certified mail, return receipt requested, with the owner also being informed that the Complaint will be amended to show the owner's entitlement to the fast lands and that if the owner does not accept the State's offer of $97,800.00, then the Declaration of Taking will be amended and the additional sum of $45,965.00 deposited with the Clerk of the Superior Court.

It is therefore recommended that authority be granted to amend the Complaint in compliance with the Order of the Court and that the additional sum of $45,965.00 be deposited with the Clerk of the Superior Court, which when added to the sum of $51,835.00 already deposited therein will equal the registered Fair Market Value of $97,800.00, this additional deposit to be made in the event the owner refuses to accept the State's offer of the registered Fair Market Value. (December 8, 1970)

This involved 31 new parcels. The Order also required that new appraisals based on the new upland ownership conditions be accomplished.

One of the designated new parcels is Parcel 2R100B7 in the name of Allen Oil Company, a Corporation of New Jersey, to which the Court allocated the sum of $71,085.00 in an amended order for payment into Court, and futher assigned to this parcel a Trial Court Calendar Control Number of C-3. This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $124,300.00. Concurrently with the drawing of this commission action, this Fair Market Value of $124,300.00 is being offered to the owner by certified mail, return receipt requested, with the owner also being informed that the Complaint will be amended to show the owner's entitlement to the fast lands and that if the owner does not accept the State's offer of $124,300.00, then the Declaration of Taking will be amended and the additional sum of $53,215.00 deposited with the Clerk of the Superior Court.

It is therefore recommended that authority be granted to amend the Complaint in compliance with the Order of the Court and that the additional sum of $53,215.00 be deposited with the Clerk of the Superior Court, which when added to the sum of $71,085.00 already deposited therein will equal the registered Fair Market Value of $124,300.00, this additional deposit to be made in the event the owner refuses to accept the State's offer of the registered Fair Market Value.

This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $2,700.00. Concurrently with the drawing of this commission action, this Fair Market Value of $2,700.00 is being offered to the owner by certified mail, return receipt requested, with the owner also being informed that the Complaint will be amended to show the owner's entitlement to the fast lands and that if the owner does not accept the State's offer of $2,700.00, then the Declaration of Taking will be amended and the additional sum of $1,265.00 deposited with the Clerk of the Superior Court.

It is therefore recommended that authority be granted to amend the Complaint in compliance with the Order of the Court and that the additional sum of $1,265.00 be deposited with the Clerk of the Superior Court, which when added to the sum of $1,435.00 already deposited therein will equal the registered Fair Market Value of $2,700.00, this additional deposit to be made in the event the owner refuses to accept the State's offer of the registered Fair Market Value. Right of Way - Route 18 Freeway

33 There is presented herewith the matter of condemnation of property on Route 18 Freeway, Section 8, Federal-aid Project F-112-(25), From Route U.S. 9 to Route 79, Parcels 92A1, 92A2, 92B, 92C, 92D1, 92D3, X92J, X92T, X92W, X92U1, X92Y, XR92M2, in the Township of Marlboro, owned by the Merritt Building Corporation, (A N.J. Corporation) et als.

The above parcels consist of subdivided building lots. The proposed highway taking prevented their sale and development and the parcels were condemned on February 13 and 21, 1969.

Meanwhile, the owners were denied use of the property and the condemnation has been delayed by reason of map and engineering parcel revisions.

As a result of condemnation, a condemnation commissioners' hearing was held on August 20, 1970, and an award in the sum of $150,000. was rendered. As this was substantially in excess of the State's estimate of fair marlet value of $140,200. the matter was appealed.

Subsequently, as a result of further negotiations, a tentative settlement was reached in the amount of $150,000, which contemplates acquiring both the Right of Way parcels and all of the damaged remnants of the owner, or a total of 33 lots, which have been appraised at $4,500. each, or a total of $148,500. (The difference of $1,500. would be an administrative settlement).

However, this agreement could not be executed in that another engineering map correction became necessary. Pending delivery of new maps and resultant new appraisals, the owner is still being denied use of his property and a hardship exists.

Authority is therefore, requested to make a deposit in the Superior Court in the amount of the State's fair market value estimate of $140,200.

In addition to the hardship circumstances, this matter is very similar to the Supreme Court decision of Nordstrom vs. Department of Conservation in which the Court ruled that the condemnation complaint was tantamount to a constructive taking and awarded interest and other costs even though the Department of Conservation had not entered on the property. Accomplishment of the court deposit will reduce the risk of such a claim in the subject acquisition.

(December 10, 1970)

Right of Way - Route 76

106 There is presented again the matter of acquisition of property on Route 76, Section 1, Federal-aid Project I-76-8-(12), from Benjamin Franklin Bridge to Kaighn Avenue. A purchase agreement covering the conveyance of Parcel 708 was approved by the Commissioner on March 3, 1967 for a consideration of $2,100 including a down payment of $500. which was subsequently made to the owners of the property, William T. Morton and Dorothy L. Morton, his wife.

Subsequently our Title Bureau advised that Mrs. Dorothy L. Morton could not be located since she was separated from her husband and further that their search indicated that there were many liens and encumbrances against this parcel which far exceed the consideration of $2,100. Our Title Bureau recommended that the Commission Action of March 3, 1967 be rescinded and that condemnation proceedings be instituted with further authority to file a suit against William T. Morton and Dorothy L. Morton in order to recover the down payment of $500. previously made. Authority was granted by Action dated June 9, 1970.

Our field office has now advised that they have been successful in locating Mrs. Morton and it appears that a deed can now be secured from both these owners. Additionally our field office reports that the loans and encumbrances have been satisfied.

Authority is therefore requested to rescind the condemnation action of June 9, 1970 and to re-institute the authority covered in the original action of March 3, 1967 so that the closing may be effected. (December 3, 1970)

Right of Way - Route 76

107 There is presented again the matter of acquisition of property on Route 76 (1953), Section 1, Federal-aid Project I-76-8-(12), From Benjamin Franklin Bridge to Kaighn Avenue, Mary M. Clayton, Trustee for Bertha A. Toliver, widow. A purchase agreement in the sum of $4,000., including a down payment of $1,000 which had been made, was approved by the Commissioner on June 15, 1970 covering the conveyance of Parcel 1066 and X1066B.

Our Title Bureau now advises that the deed to Mary M. Clayton, Trustee, its execution, delivery, and other circumstances as pertains to its contents is questionable and that they do not consider it as a complete, valid and an enforceable transfer of the fee title. Our Title Bureau certifies that title is vested in the heirs of law of Bertha A. Toliver and that the names and addresses of many of these heirs are unknown.

Authority is, therefore, requested to rescind the agreement and the action of June 15, 1970, and that authority be granted to institute condemnation proceedings for the acquisition of Parcel 1066 and X1066B in fee simple, subject to any public utilities existing in the premises. Prior to the ultimate fixing of compensation, should any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit in the Superior Court the State's registered fair market value of $4,000.

Authority is also requested to file a suit against the trustee, Mary M. Clayton to effect recovery of the down payment of $1,000 previously made.

Upon taking of possession, authority is requested to dispose of the improvement to the road contractor, by public auction, or by sealed bids.

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel in fee simple, subject to any public utilities existing in the premises. The State's registered Fair Market Value of $100. was offered to and refused by the owners who demanded an exchange of lands, which is not acceptable.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the Court $100.

(December 10, 1970)

109 Right of Way - Route 78

There is presented again the matter of acquisition of property on Route 78, Section 5B, Federal Aid Project I-78-5-(12), from Main Street to Springfield Avenue, Armand Fernand, et ux. Condemnation proceedings were authorized for Parcel 41 on August 8, 1966. On June 30, 1967 a complaint was filed and a court deposit was made in the sum of $91,100.

Subsequently, the parcel was revised and was re-designated as Parcels R41A and R41B for which condemnation was authorized on November 22, 1967. On February 18, 1969 the parcels were again revised by the engineers and are now designated as Parcels R41A and 2R41B. These parcels have been appraised and the Reviewer's registered Fair Market Value Determination is $55,100.

It is recommended that authority be granted at this time to institute condemnation proceedings for the acquisition of these parcels subject to any public utilities existing in the premises, due to the imminent court hearing, with the understanding that negotiations will be conducted with the owner as soon as an appointment can be arranged. The Fair Market Value was the same for Parcels R41A and R41B ($55,100.) and an offer was made to and refused by the owner at that time.

It is further recommended that the complaint on file be amended to substitute the map and description for Parcels R41A and 2R41B in the place and instead of those previously filed. (December 9, 1970)

110 Right of Way - Route 78

There is presented again the matter of acquisition of property on Route 78, Section 5D, Federal Aid Project I-78-5-(3), from Springfield Avenue To Garden State Parkway, Parcel 402, Lucy Gallini, et al. On February 25, 1970 an agreement was approved by the Assistant Commissioner, Highways, in the sum of $250. in the above captioned matter.

Subsequently, it has been determined that Title to this parcel was not vested in the above ownership but in fact was part of a dedicated street. Based on this information Parcel 402 has been eliminated by the engineers. It is recommended that the commission action dated February 25, 1970 be rescinded and that the agreement previously approved for Parcel 402 be declared null and void.

100 There is presented the matter of the appeal by the State from an award of Commissioners in the amount of $292,884.66. A judgment in the amount of $270,500 was entered against the State in the condemnation of property on Route 78, Section 5H, Parcels 12A, B, C, R12D, in the City of Newark, owned by Mannkraft Corp.; et al.

While there may be two technical grounds for appeal in this matter, an appeal is not recommended. This matter has been reviewed by the Assistant Attorney General in charge of Appeals, Stephen L. Skillman, and by the First Assistant Attorney General, Marilyn L. Schauer. Both concur with the undersigned since the Federal Government has finally concurred in our view as to what existing State law holds on the doctrine of general benefits. The trial court, in the instant case, applied that doctrine correctly. The verdict obtained by our trial attorney was a good one, in view of the fact that it was $21,500 under the commissioners' award. While the jury did compromise its verdict, it obviously gave prevailing weight to the State's testimony since the owner's values exceed close to $500,000. Another jury may not show the same good judgment.

Parcels R135A, 135B E135D, E136D; R136A, R135C	Morris County Park Commission	Consideration $215,000

The parcels have been appraised and the Reviewer's registered Fair Market Value Determination for Parcels R135A, 135B, E135D, E136D is $21,600, and for Parcels R136A, R135C is $164,000, total $185,600

The settlement varies substantially from the Reviewer's registered Fair Market Value Determination and is justified by the fact that the State does not have statutory authority to institue condemnation for these lands. In addition, we are dealing with a special purpose Park property where the matter of damages evolve from severance, loss of assemblage, access and replacement is difficult to accurately determine. The Park Commission has submitted a legal opinion that the basis of evaluation should be on the principle of substitution which would obviously generate a much higher value for the lands being acquired. The State must also recognize that we are affecting a public recreational facility as well as the environment and ecology surrounding this Park facility.

This agreement would appear to be in the best public interest and approval is recommended.(December 18, 1970)

There is presented again the matter of acquisition of property on Route 80, Section 5K, Federal Aid Project I-80-5-(12), New Jersey and New York Railroad (Erie) at Hackensack to Hackensack River. Condemnation proceedings were previously authorized, as the owner's demand was $504,200., which was considered excessive.

Subsequently, the appraisals were updated to the complaint date. Continued negotiations have resulted in the execution of an agreement as follows:

Parcels R37A1, 37B, & R37C	Prudential Insurance Co. including $178,849. previously withdrawn from court.	Consideration $314,913.

These parcels have been appraised and the Reviewer's registered Fair Market Value Determination is $244,700. This is a package settlement of one of the most complex acquisitions made in many years. The acquisition comprises 18 parcels from a multi-million industrial complex.

The acquisition process began in 1962. There were many delays and parcel revisions beyond the control of the Department in that they involved court actions and orders brought about both by the owner's, their tenants, and the local municipality. Further complicating the matter was litigation over the severance and restoration of a railroad right of way which ultimately necessitated new State legislation and for a considerable period of time prevented the completion of the subject section of Route 80 and to this date, the railroad serving the subject premises has not been entirely restored.

The Fair Market Value of the subject parcel is $244,700. The total of the 18 parcels being submitted by various action as a part of the"package" and the variances are as follows:

CASE	PARCELS	FAIR MARKET VALUE	SETTLEMENT	VARIANCES
** 1.	R37A1, R37B, R3	$244,700.	$314,913.	$70,213.
2.	R37A2, R37D	$ 53,600.	$ 72,930.	$19,330.
3.	UER204, UE2R188D UER37E, UE203 UE3R188A, UE3R188B UER202, UE202B, UE202C	$ 26,600.	$ 35,101.	$ 8,501.
4.	UE37G	$ 22,500.	$ 27,056.	$ 4,556.
	TOTALS	$347,400.	$450,000.	$102,600.

(**Subject)

While the variance for the subject and the other parcels is substantial, the settlement is indicated to be in the overall public interest for the reasons above stated and as indicated in detail on the attached administrative recommendation dated October 9, 1970 which has been submitted by the District Supervisor, Patrick P. Bosetti.

Also the case preceded the declaration of taking statute and court deposit statute by many years. Interest alone to which the State would be obligated if the matter were further litigated would formulate a figure with the Fair Market Values of $446,912. and based on prior court experience, there is little likelihood that any award or judgement would be limited to the State's value estimate. Court costs for trying these 18 parcels would also be significant. The cases being over 8 years old under Federal regulations, they may be considered as one of the factors in an administrative settlement. For all the foregoing reasons approval is recommended.

Authority is requested to make payment of $136,064., representing the difference between the consideration provided for in the agreement and the deposit withdrawn from the court. It is also recommended that condemnation proceedings previously authorized be discontinued. **(December 23, 1970)**

The occupant, Humble Oil, had complied with our requirements and procedures concerning a business relocation. However, in reviewing the estimates submitted, it was at first determined that certain items in the estimates were considered to be realty and could not be relocated. Humble Oil was requested to re-submit their estimates eliminating the items in question.

Subsequently, they submitted an affidavit citing clauses in their leases with the owner of the subject properties which indicated that all equipment in relation to the subject gas stations, were the personal property of Humble Oil and Refining Company. Also submitted were paid bills indicating the actual cost to Humble Oil of $1,928.64. Experience obtained in processing numerous business moves of this nature indicates these bills to be reasonable.

Authority is requested to pay the amount of $1,928.64 to Humble Oil and Refining Company as reimbursement of their actual moving cost based upon the submission of their paid bills. (December 23, 1970)

Re-negotiations were conducted with the Attorney for the owner who demanded agreement form revisions unacceptable to the State.

It is therefore recommended that authority be granted to institute condemnation proceedings for the acquisition of Parcel RE89F-2, subject to any public utilities existing in the premises.

It is further recommended that the complaint on file be amended to substitute the map and description for Parcel RE89F-2 in place and instead of those previously filed. (December 21, 1970)

Services - Engineering
Route 130
James P. Purcell Associates

The services required in our agreement dated July 29, 1968 with James P. Purcell Associates in connection with Route 130, envisioned a project that would cost approximately $2,000,000. In developing a satisfactory solution the designs, and the corresponding scope of work, were increased to include two additional loop ramps with the associated widened bridge, a local street connection, plus increase in the length of the project by one-half mile. These in turn also increased the Right-of-Way requirements formerly depicted. The construction cost fee basis utilizing the same unit prices of the original negotiations, is now $4,000,000.

The fee equivalency approved was 5.2 per cent. The increase in construction cost will reduce this percentage to 5.05. The lump sum fee required is, therefore, $202,000. In addition, the Consultant has been requested to make changes in the layout of ramp WN and in the width of Hickory corner Road which amounted to an additional expenditure of $5,000, which must be considered extra work and should be added to the above lump sum. To reimburse the Consultant for the increased services for the lump sum phase of the agreement an additional $94,500 is required. There is

approximately $14,500 available from the Soils and contingency account, which can be used to off-set the additional funds required. It is, therefore, recommended that these funds be utilized and the sum of $80,000 be set up.

These monies can be transferred from Item 147 of the 1969 Construction Program to Item 165 and made available for this project.

Research Project 7726
Roadside Vegetation

On February 16, 1970 the Department of Transportation, on behalf of the State of New Jersey negotiated a contract with Rutgers for the conduct of a research project identified as #7726 - Roadside Vegetation. This is a research project with federal participation. The agreement contained a clause that requires a letter of authorization at the beginning of each calendar year before any research could be conducted in that calendar year.

Progress on the research project during calendar year 1970 has been satisfactory, funds for calendar year 1971 are available in Account 612-100-389. It is desirable to continue the project in its second calendar year.

Therefore, it is requested the attached letter approving calendar year 1971 work be signed and forwarded to Rutgers.

Research Project No. 7731
"Preformed Elastomeric Joint Sealers for Bridges"

The Division of Research and Evaluation, in the conduct of Research Project No. 7731 "Preformed Elastomeric Joint Sealers for Bridges", a research project with federal participation, has through the project engineer, Mr. George Kozlov, developed a "Model Joint Machine" to simulate most of the behavior patterns of a bridge joint. This "Model Joint Machine" will be used to test and evaluate sealer samples.

Shop drawings of this device have been prepared and a proto-type has been built in the Department's Fernwood Shops. To the best of our knowledge this particular design is unique, although the principle upon which the machine is based is somewhat similar to that used by the DuPont Company in its development of a joint simulator (Materials Research and Standards, Volume 9, No. 7, July 1969 Bellows-Activated Joint Simulator, by E. C. Fetter.)

In that we have developed the Model Joint Machine, and have requests from sealer manufacturers for a set of the drawings, it is now considered highly desirable to obtain a patent for the "Model Joint Machine" prior to releasing any information. It is conceivable that if we do not apply for such a patent, the vendors may, and we could subsequently be required to pay a royalty for using a piece of equipment essentially developed by our own forces.

It is therefore requested authority be granted, and funds be established for, the action necessary to obtain a patent on the "Model Joint Machine". It is estimated the total cost of obtaining such a patent is $2,000.00. (January 6, 1971)

There is again presented the matter of acquisition of property on Route 18 Freeway, Section 9, Federal Project F-112-(26), Route 79 To Route 34. Condemnation proceedings were previously authorized on April 19, 1968 as the owners' demand was considered excessive.

A commission hearing was held on February 12, 1969 and an award in the amount of $38,000 granted. Continued negotiations have resulted in the execution of an agreement as follows:

Parcel 14 Soloman Brzoza and Racha Brzoza, h/w Consideration $37,500.

Less allowance to State for owners retention and removal of the one story frame dwelling $ 2,000.

The parcel was re-appraised and the Reviewer's Re-registered Fair Market Value Determination is $32,500, the retention estimate is $2,000. 65 Right of Way - Route 20F

There is presented the matter of an agreement for a self relocation payment for the removal of personal property on Route 20F, Section 2, from Route U.S. 46 Interchange to Main Street, Parcel 375.

The tenant, Wall Fabrics, Inc., has complied with our requirements and procedures concerning a business relocation. However, due to the complexity of his business operation, he has made application for a self move. This application is based on the fact that if an outside mover was employed, it would require the closing down of his business operations. This would result in a financial loss to the business, as well as a work loss to the employees. It is our opinion that due to the complexity of the operation as well as the financial loss to the employees and business which may occur, a self move is the only solution to this business relocation.

It is recommended that the agreement for a self move be approved, and that further authority be granted to reimburse Wall Fabrics, Inc. up to the amount of $18,600 for expenses incurred in their relocation.

(December 29, 1970)

The tenant, American Sanitary Wiping Cloth Co. has complied with our requirements and procedures concerning a business relocation. However, due to the complexity of his business operation, he has made application for a self move. This application is based on the fact that if an outside mover was employed, it would require the closing down of his business operations. This would result in a financial loss to the business, as well as a work loss to the employees. It is our opinion that due to the complexity of the operation as well as the financial loss to the employees and business which may occur, a self move is the only solution to this business relocation.

Parcels R33A, R33B	Allied Chemical Corporation	Consideration $30,000

The parcel was reappraised and the Reviewer's Reregistered Fair Market Value Determination is $2,600. The variance is not substantial and the agreement would appear to be in the public interest. It is recommended that this agreement be approved and that the condemnation proceedings previously authorized be discontinued.

72 Right of Way - Route 80

There is presented again the matter of acquisition of property on Route 80, Section 5K, Federal-aid Project I-80-5-(12), New Jersey and New York Railroad (Erie) at Hackensack to Hackensack River. Condemnation proceedings were previously authorized, as the owner desired to have all parcels in their name negotiated at one time.

Continued negotiations have resulted in the execution of an agreement as follows:

Parcel UE37G Prudential Insurance Co. Consideration $27,056.

This parcel has been appraised and the Reviewer's registered Fair Market Value determination is $22,500. This is a package settlement of one of the most complex acquisitions made in many years. The acquisition comprises 18 parcels from a multi-million dollar industrial complex.

The acquisition process began in 1962. There were many delays and parcel revisions beyond the control of the Department in that they involved court actions and orders brought about both by the owners, their tenants, and the local municipality. Further complicating the matter was litigation over the severance and restoration of a railroad right of way which ultimately necessitated new State legislation and for a considerable period of time prevented the completion of the subject section of Route 80 and to this date, the railroad serving the subject premises has not been entirely restored.

The fair market value of the subject parcel is $22,500. The total of the 18 parcels being submitted by various actions as a part of the "package" and the variances are as follows:

Case	Parcels	Fair Market Value	Settlement	Variances
1.	R37A1,R37B,R3	$244,700.	$314,913.	$70,213.
2.	R37A2, R37D	$ 53,600.	$ 72,930.	$19,330.
3.	UER204,UE2R188D, UER37E,UE203,UE3R188A, UE3R188B,UER202,UE202B, UE202C	$ 26,600.	$ 35,101.	$ 8,501.
**4.	UE37G	$ 22,500.	$ 27,056.	$ 4,556.
	TOTALS	$347,400.	$450,000.	$102,600.

(**Subject)

While the variance for the subject and the other parcels is substantial, the settlement is indicated to be in the overall public interest for the reasons above stated and as indicated in detail on the attached administrative recommendation dated October 9, 1970 which has been submitted by the District Supervisor, Patrick P. Bosetti.

Also, the case preceded the declaration of taking statute and court deposit statute by many years. Interest alone to which the State would be obligated if the matter were further litigated would formulate a figure with the fair market values of $446,912 and based on prior court experience, there is little likelihood that any award or judgment would be limited to the State's value estimate. Court costs for trying these 18 parcels would also be significant. The cases being over 8 years old under Federal regulations, they may be considered as one of the factors in an administrative settlement. For all the foregoing reasons approval is recommended.

There has been no court deposit.

It is also recommended that condemnation proceedings previously authorized be discontinued. (December 29, 1970)

76 Right of Way - Route 37 Freeway

There is presented the matter of a Dwelling Lease Occupancy Agreement for the dwelling located on Route 37 Freeway, Section 1, from Route U. S. 206 to New Jersey Turnpike, Parcel 62.

A complaint was filed in the above case on December 9, 1968, and the commissioners made an award in the matter on February 16, 1970. The State appealed the award in the amount of $51,400, and subsequently accepted a judgment of $48,000 plus interest to September 8, 1970.

The rent to be charged in the amount of $400 is based on our 10% formula since a thorough survey of the market indicated no comparable rental properties. The rent to be charged of $400 is fair and reasonable, and in addition, the owner will have full use of the State's purchase price payment of $48,000 during the rental period. As an inducement to proceed with the proposed lease, the owners have agreed to waive interest on the judgment from September 8, 1970, forward.

Authority is requested to rent the dwelling to the family of Elmer Smith for a rental of $400 per month based on the terms and conditions set forth in the Dwelling Lease Occupancy Agreement, Rent Account Number 37F-1-62-1.

At the hearing before the Commissioners held on November 17, 1970 the State presented testimony in the amount of $3,000. The property owner did not present expert testimony. Commissioners returned an award in the amount of $3,250.

The State was represented by Birger M. Sween, Esq.

It is recommended that the award in the amount of $3,250 be approved and that payment in the sum of $300, being the amount over and above the deposit paid into Court, be paid together with lawful interest as computed by the Bureau of Titles.

No appeal is recommended since the commissioners award is fair and reasonable and the payment of the award is recommended as in the public interest. (December 24, 1970)

116 Right of Way - Route 20F

There is presented herein the matter of the award of commissioners entered against the State in the condemnation of property on Route 20 Freeway, Section 2, Parcels 65 and 80A, in the City of Paterson, owned by Prince Garage, Inc., a corporation of New Jersey.

A judgment in the amount of $14,000.00 was entered against the State in the condemnation of property on Route 287, Section 7, Parcel 101B1, owned by St. Bernard's Protestant Episcopal Church, et als.

At the trial before the Court, the owner testified to $42,000.00. The State testified to $8,300.00 for the partial taking of an improved parcel. Fair Market Value was registered in the amount of $8,300.00. There was a deposit paid into Court in the amount of $6,900.00. The complaint was filed October 7, 1969.

The State was represented by Fee Attorney David H. Rothberg, Esq.

It is recommended that the verdict in the amount of $14,000.00 be approved and that payment in the sum of $7,100.00, being the amount over and above the deposit paid into Court, be paid together with lawful interest as computed by the Bureau of Titles. 129 Right of Way - Route 287

There is presented here the matter of the appeal by the State from an award of Commissioners in the amount of $4,520. A consent judgment in the amount of $2,000 was entered against the State in the condemnation of property on Route 287, Section 13, Parcel RE51C, owned by Solomon Fogelson; et al.

The complaint was filed on February 13, 1963 and deposit was made into court in the amount of $150. The Fair Market Value was registered in the amount of $200.

JANUARY 8, 1971 37 NO. 1 - 1971

The State was represented by Fee Attorney Edward D. McKirdy.

At the trial before the court and jury the owner offered testimony in the amount of $3,150 for the taking of the drainage easement. The testimony of the State was in the sum of $200. At the conclusion of the trial and prior to summations by counsel to the jury the court renewed settlement discussions that were had by and between respective counsel, owner, court and James V. Hyde, Jr., Director, Division of Right-of-Way, who authorized a settlement for $2,000 inclusive of interest and all claims against the State.

A jury verdict could reasonably have exceeded the amount of the settlement. A verdict would be substantially increased by more than seven years interest added. The settlement represents a substantial decrease from the amount of the award of $4,520. The settlement of $2,000 is considered fair and reasonable and in the best interest of the State.

It is recommended that the consent judgment in the amount of $2,000 be approved and that payment in the sum of $1,850, being the amount over and above the deposit paid into Court, be paid together with lawful interest as computed by the Bureau of Titles. (December 29, 1970)

At the trial, the owner testified to $97,200.00. The State testified to $41,100.00 for the partial taking of an unimproved parcel. Fair Market Value was registered in the amount of $41,100.00. There was a deposit paid into Court in the amount of $26,500.00. The complaint was filed February 13, 1969.

The State was represented by Louis C. Portella, Esq.

It is recommended that the verdict in the amount of $52,000.00 be approved and that payment in the sum of $26,500.00, being the amount over and above the deposit paid into Court, be paid together with lawful interest as computed by the Bureau of Titles. There are no grounds for appeal. (December 24, 1970)

Legal Items

Right of Way - Route 33

120 There is presented the matter of the consent award in the condemnation of property on Route 33, Section 4, Parcels R78B, 78C owned by Kathryn Szczepanik; et al.

At the hearing scheduled for November 16, 1970 and after consultations with the Legal Division, a consent award of $15,950 to include all accrued interest was granted. Complaint was filed on June 7, 1968 and deposit was made into court on August 31, 1970 in the amount of $6,800 which together with the $7,000 previously deposited makes a total deposit into court of $13,800. Fair Market Value was registered in the amount of $13,800 on May 26, 1970.

The State was represented by Fee Attorney Leonard Finkelstein.

It is recommended that the consent award in the amount of $15,950 be approved and that payment in the sum of $2,150, being the amount over and above the deposit paid into Court, be paid together with lawful interest as computed by the Bureau of Titles.

No appeal is recommended since the consent award is fair and reasonable and the payment of the consent award is recommended as in the public interest.

Right of Way - Route 76

121 There is presented again the matter of the condemnation of the property located on Route 76, Section 1, Parcel 893, known as #826 Chestnut Street, Camden, New Jersey, and owned by the Estate of Charles Williams; et al.

The State entered into an agreement on July 22, 1968 for the acquisition of the aforesaid parcel for the sum of $4,000.00 but because of legal problems the said commission action was rescinded by commission action of July 21, 1970 and by said commission action condemnation proceedings were authorized.

A Declaration of Taking was filed on July 31, 1970 and a deposit in the sum of $4,000.00 was paid into Court, and on the same date a complaint was filed.

Commission hearing was held on the 22nd day of September, 1970 and the State's witness testified to a value of $4,000.00 whereas the property owner testified to a value of $5,000.00 and the Commissioners made their award in the sum of $4,700.00.

It is therefore recommended that the Commissioners' Report be approved and the additional sum of $700.00 be paid into Court. The cost of an appeal in terms of time and saving would certainly exceed the latter sum.(Jan.12,1971)

121 Right of Way - Route 80

There is presented here the matter of the award of commissioners in the condemnation of property owned by William Selle; et al.

At the hearing before commissioners the State offered testimony in the sum of $300, which was its best estimation of the fair market value for a ditch easement. The State's Engineer stated that this easement was not on the defendant's property so that the State had to dig the ditch, create slops and construct and maintain a head wall. This engineer was substituted at the very last moment. The Real Estate Evaluator maintained that a ditch was always there and that we merely deepened and widened it, but the ditch was always on the railroads property adjoining the defendant's property until the State eliminated the railroad and widened the banks that supported the railroad. This caused the ditch to be pushed aside and onto the defendant's property. No one disputes that fact therefore, the engineer's opinion seems valid.

The owner presented questions and testimony on his own behalf without benefit of counsel or experts. The ditch easement is to be maintained by entry upon the railroad's banks in that area. Mr. Selle questions the practicality of that idea. In addition thereto

he pointed out that most easements would still allow any use of the square footage involved, such as sewer and water lines, overhead wires; etc. plus the loss of the land which was removed for the ditch which would normally grow the crops. The State's evaluation was $150. for drainage easement and $100. for slope easements, but nothing for loss of use of the farm land and the maintenance (nuisance structure) to the owner and a nominal figure of $300. based on this by the appraisal.

The commissioners made an award in the sum of $1,000. based in my judgment upon the inadequacy of the appraiser's evaluation and also the disparity between the Engineer and the Evaluator as to whether a new ditch was dug with appurtenant structures vs. merely the deepened and widened ditch. Despite the last minute substitution, I felt the engineer did and excellent job of presenting his facts. The commissioners, nevertheless, were very annoyed with the shallowness or lack of facts upon which we placed our appraisal.

A protective appeal has been filed, but based upon the facts above I am strongly recommending settlement because the figures were reasonably close and our facts on an evaluation basis would be very negative at a trial.

In addition the case does not warrant the expenditures of funds to pursue the appeal because of the expense of the appeal.

Cost of witnesses is a factor in the hearing on the appeal plus the cost of the bus and a jury trial and transcripts. This expense would not exceed the difference in the award and our offer. (January 12, 1971)

Right of Way - Route 35

There is presented again the matter of acquisition of property on Route 35 (1953), Section 9, Leonardville Road To Route 36. Condemnation proceedings were previously authorized on October 10, 1966, as owners demand of $50,000 was considered excessive.

Subsequently, the appraisals were updated to date of complaint which resulted in the Fair Market Value being reregistered in the amount of $1,400. On the day of the Commission Hearing an offer was received from the owner's attorney to settle this matter in the amount of $2,400. which resulted in the execution of an agreement as follows;

Parcel 1131 Levin Corporation (A New Jersey Corporation) Consideration $2,400.

The variance from the appraisal value of $1400. is substantial. However, the settlement has been concurred in and recommended by the trail Attorney Riskin. This is a partial taking from an improved commercial property inwhich damages would be the major point of contention. An award could not be achieved less than the proposed settlement, also legal cost should be considered as the case is over two years old. The agreement is in the public interest, approval is recommended.

It is further recommended that condemnation proceedings previously authorized be discontinued.

Authority is requested to withdraw the deposit heretofore made into the Superior Court under Declaration of Taking. (January 22, 1971)

S. 322, Parcel E2, on which the Commissioner approved a purchase agreement for the conveyance of Parcel E2 in the sum of $275 by action dated September 28, 1961.

Subsequent to the date of the execution of this agreement by the owners, Estella Marion Vaughn and Howard Alten Vaughn, her husband (but prior to the execution of the deed to the State) the premises were conveyed to the Guarantee Bank & Trust Company of Hammonton, New Jersey.

Our Title Bureau requested that our engineers investigate the feasibility of eliminating this slope easement prior to requesting that negotiations be undertaken with the new owners. On January 4, 1971 our engineers eliminated Parcel E2 from our General Property Parcel Maps.

Authority is therefore requested to eliminate Parcel E2 from the State's General Property Parcel Maps and to rescind the agreement executed by Estella Marion Vaughn and Howard Alten Vaughn, her husband, as well as the Commission Action of September 28, 1961 approving same. On December 30, 1969, Commissioner David J. Goldberg approved a Dwelling Lease Occupancy Agreement for the tenant for a monthly rental of $145.00. At the end of February, Mr. & Mrs. Hunter moved and Mr. Scott was advised by a representative of our field office to take over the job as Superintendent of the building at a reduced rental of $120.00 per month. Since the District and Headquarter Office were not advised of this action, we have been carrying a debit of $25.00 per month on our books for the past ten (10) months. 3 Claims - Settlement

The Department of Transportation is carrying a claim against Joseph R. Sunderland, et al, in the amount of $1109.97 arising out of an accident occurring on February 10, 1969. As the result of said accident, bridge concrete balustrade and timber guard railing was damaged and had to be repaired.

The insurance carrier for the above debtor, upon being presented with the Department's bill, denied liability and refused to honor our claim on the grounds that the road surface was extremely icy and hazardous at the time of the accident and no effort had been made by the Department of Transportation to salt or warn the motoring public of the hazardous condition. The Claims Bureau replied to the insurance carrier that suit would be instituted unless a reasonable settlement of the State's claim could be negotiated.

Subsequently the insurance carrier agreed to meet the state half way and offered the sum of $554.99 in full settlement of the Department's claim. The offer of settlement was discussed with Deputy Attorney General John Fitzpatrick who after reviewing the file felt the best interest of the State would be served if we accepted the insurance company's offer.

Giving due consideration to all the circumstances involved, it would appear that the proposed offer is fair and reasonable and it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the approval of David A. Biederman, Deputy Attorney General, that it receive favorable consideration and be approved. (February 2, 1971)

Claims - Settlement

4 The Department of Transportation is carrying a claim against Mr. Forrest Howe in the balance of $381.21 arising out of an accident occurring on August 8, 1965 at the Airport Circle Bridge, Pennsauken, New Jersey. As the result of said accident, 10 feet of guard railing on the bridge was damaged and had to be repaired at a total cost of $546.21. Mr. Howe has reduced his debt to the present balance of $381.21 by periodic installment payments.

Recent negotiations by the Claims Bureau with Mr. Howe has resulted in a lump sum offer of $200.00 in full settlement of this balance. The accident apparently occurred as the result of a tire blowing out on the tractor which he was operating. Mr. Howe alleges that the accident was actually caused as the result of some one cutting the tire on his tractor.

At the time of the accident there was considerable confusion as to whether he was acting as an agent for the Bair Transport Company. The Bair Transport Company refused to accept our claim on the grounds that Mr. Howe at the time of the accident, never hauled a load for Bair Transport Company, never drew any money from the company, and was not on the Company's business at the time of the accident. The tractor being operated by Mr. Howe was being driven to Lindenwold for servicing. At the time of the accident, no trailer was attached to the tractor. The tractor was not insured at the time of the accident in question.

The proposed offer of settlement was discussed with counsel to the Department of Transportation who agreed that the best interest of the State would be served if we accepted the lump sum settlement rather than attempt to collect the full amount of the claim by periodic installments.

Giving due consideration to all the circumstances involved, it is our recommendation that the offer of $200 receive favorable consideration and be approved in accordance with Mr. Levine's memorandum attached, hereto, and the approval of David A. Biederman, Deputy Attorney General. (January 25, 1971)

Condemnation proceedings were previously authorized at which time the owners' demand of $5,000 for Parcels 265A and 265B collectively was considered excessive.

(January 22, 1971)

Right of Way - Route 35

57 There is again presented the matter of acquisition of property on Route 35 (1953), Section 6, Asbury Avenue to Eatontown. Condemnation proceedings were previously authorized on January 8, 1970 as the owner refused the State's Suggested Settlement of $2,125. and refused to negotiate further at that time.

Subsequently, the appraisal was updated to the date of complaint in the amount of $2,300. Negotiations have resulted in the execution of an agreement as follows:

Parcel 37 — Real Properties, Inc. (A New Jersey Corporation) — Consideration $3,475.

The variance from the appraised value of $2,300. is substantial. However, the settlement has been concured in and recommended by the trial attorney G. Roettger. The subject parcel is one of 3 cases in the same location all of which have been settled as a package thereby avoiding legal costs etc.

The total package for the 3 cases was in the amount of $4,500. vs. the appraised value for the 3 parcels of $2,975. For the above mentioned reasons in that the variance in the agreed package settlement is not substantial, it is felt that agreement is in the public interest.

It is recommended that this agreement be approved and that the condemnation proceedings previously authorized be discontinued.

Further authority is requested to withdraw the deposit heretofore made into the Superior Court under Declaration of Taking. (January 22. 1971)

Right of Way - Route 46

58 There is presented again the matter of acquisition of property on Route 46, Section 18, Control Section 1607-401, from Route 3 to Main Avenue. Condemnation proceedings were previously authorized due to the reiterated delays requested by the owner's attorney, who was attempting to obtain certain mortgage releases related to the ownership.

Continued negotiations have resulted in the execution of an agreement as follows:

Parcel 2 — Bowlero, Inc. — Consideration $1,500.

This parcel has been appraised and the Reviewer's registered Fair Market Value Determination is $1,500. Approval is recommended.

It is also recommended that condemnation proceedings previously authorized be discontinued. Further authority is requested to withdraw the money previously deposited in court. (January 22, 1971)

Right of Way - Route 55 Freeway

59 There is presented again the matter of acquisition of property on Route 55 Freeway, Section 7, From Route 47 to Oak Road. Condemnation proceedings were previously authorized on July 17, 1970, at which time the owner refused the State's Fair Market Value of $10,500 and demanded $14,000. which is considered excessive.

Continued negotiations have resulted in the execution of an agreement as follows:

Parcel 37A — Jacob Dudelczyk and wife — Consideration $11,500.

The parcel has been appraised, and the reviewer's registered fair market value determination is $10,500. The variance not being substantial, the agreement would appear in the public interest. Approval is recommended.

It is further recommended that condemnation proceedings previously authorized be discontinued.

Authority is requested to dispose of the farm outbuilding to the road contractor, by public auction or by sealed bids. (January 22, 1971)

60 Right of Way - Route 72

There is presented again the matter of acquisition of property on Route 72 (1953), Section 7, Federal Project LSF-130-(3), From Route U. S. 9 To Bridge Over Manahawkin Bay. Condemnation proceedings were previously authorized on July 10, 1969 as the owners' demand was considered excessive.

Subsequently, a Commission Hearing was held and an award was rendered in the amount of $4,300 which was appealed by the State. At the Trial on the appeal a pretrial conference was held. The presiding Judge proposed a settlement in the sum of $4,050 which was accepted by the owners' attorney.

Continued negotiations have resulted in the execution of an agreement as follows;

Parcel L21B James L. Bates and Lucille Bates, h/w Consideration $4,050.

The parcel was reappraised and the Reviewer's Reregistered Fair Market Value Determination is $3,175. The variance is not substantial and the agreement would appear to be in the public interest.

It is recommended that this agreement be approved and that the condemnation proceedings previously authorized be discontinued.

61 Right of Way - Route 3

There is presented again the matter of acquisition of property on Route 3, Section 3, Federal Project U-136-(13), Passaic River to Route 20, Parcel 89A, Bellemead Development Corporation. Condemnation proceedings were previously authorized for the acquisition of this parcel on October 20, 1969.

Subsequently, the engineers revised the parcel now designated as Parcel 89A-1. This revised parcel has been appraised and the Reviewer's registered Fair Market Value determination is $292,000. Re-negotiations were conducted with the owner's agent but this property is now the subject of a suit in which the upland owner and the State of New Jersey are claiming that the original riparian grant to Bellemead did not legally bind the State and should be set aside.

It is therefore recommended that authority be granted to institute condemnation proceedings for the acquisition of Parcel 89A-1 subject to any public utilities existing on the premises.

It is further recommended that the complaint on file be amended to substitute the map and description for Parcel 89A-1 in the place and instead of those previously filed. A deposit of $203,000. was made into the court.

Further authority is requested to deposit an additional $89,000. which when combined with the $203,000. will bring the total deposit to $[illegible].

There is presented again the matter of acquisition of property on Route 3, Section 3, Federal Project U-136-(13), Passaic River to Route 20, Parcel 29[illegible], Visvaldis Dzenis and Sigrida Dzenis, h/w. Condemnation proceedings were previously authorized for the acquisition of this parcel on July 1, 1970.

Subsequently, the engineers revised the parcel now designated as Parcel 29B. This revised parcel has been appraised and the Reviewer's registered Fair Market Value determination is $157,700. Re-negotiations were conducted with the owner's agent who rejected the Fair Market Value offer and demanded $17[illegible], which is considered excessive.

It is therefore recommended that authority be granted to institute condemnation proceedings for the acquisition of Parcel 29B in fee simple subject to any public utilities existing in the premises.

It is further recommended that the complaint on file be amended to substitute the map and description for Parcel 2R98 in the place and instead of those previously filed. Deposits totaling $157,700. have been made into the court. (January 22, 1971)

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of Parcels R85 and 85D, plus Remnants, in fee simple, subject to any public utilities existing in the premises.

The State's Reregistered Fair Market Value Determination of $23,700 for Parcels R85 and 85D, plus $460 for the three Remnants, totaling $24,160, was offered to and refused by the owners, whose demand of $41,000 was considered excessive.

It is further recommended that the complaint on file be amended to substitute the map and description for Parcels R85 and 85D, plus Remnants, in the place of and instead of those previously filed.

Authority is requested to deposit an additional $4,760, with the court which when added to the amount of $19,400. previously authorized for deposit will equal the re-registered Fair Market Value of $24,160. There has been no deposit made to date since possession has not been required. (January 22, 1971)

The agreement with the township was in the sum of $74,991, less an allowance to the State for the construction of a pedestrian overpass in the sum of $42,700. The net cash consideration was in the sum of $32,291 and covered Parcels 4, 13, 24, 26, R26A, 28B, 29, 30A, 30B, 30C, 30D, 30E, 30F, R30G, 30H, 30I, 30J, 30K, 30L, 30M, 32, 33, 34, R35, R36, 38, R40D, 41, 42, 44, 47, 49, 50, 51, 52, 53, 54, 55, 56, R57, R58, 59, 60, 61, 62, 63, R64, and 2R65B.

Subsequently, our Title Bureau advised that title to Parcel 61 was involved and would require as much as several years to clear. The township solicitor to Neptune Township agreed that the sum to be paid by the State of New Jersey to the township be reduced by the value attributed to Parcel 61 in the sum of $950 and that that parcel be deleted from those parcels which the township had previously agreed to convey.

The Commissioner, on June 18, 1970, granted authority to amend the commission action of May 5, 1967 to delete Parcel 61 therefrom and the remaining parcels were subsequently closed.

Our Title Bureau, on January 5, 1971, advises that the Township of Neptune had now perfected its title to Parcel 61 and that clear and marketable title is now established in the Township of Neptune. Authority is, therefore, requested to

pay the sum of $950 to the Township of Neptune, which represents the previously agreed upon value. Authority is also requested to amend the action of June 18, 1970 to restore Parcel 61 and to settle the same, based upon the agreement conveying this parcel approved on May 5, 1967.

72 Right of Way - Route 280

There is presented the matter of moving cost reimbursement for the occupant, Georgina Krueger, who resided in a dwelling located on Route 280, Section 4, Project: I-280-6-(7), from Prospect Avenue to Northfield Avenue, Parcel 136.

This parcel was originally a partial taking, however, during construction, the engineers discovered a weakness in the underlying rock strata. This weakness could have resulted in a rock slide which would have undermined the subject dwelling. The parcel was immediately revised to an entire taking and the procedure for vacating the property was accelerated. Due to the emergency involved, Mrs. Krueger was not afforded the opportunity to obtain two (2) estimates for her relocation. Mrs. Krueger did submit one (1) estimate which covered the relocation of her household personal property from West Orange to Spring Lake, New Jersey. Since the move was in excess of our fifty (50) mile limit, Mrs. Krueger has submitted an invoice in the amount of $1,178.45 based on a fifty (50) mile radius. The former dwelling was a very large home and compared to moving cost of similar size dwellings, the above cost appears to be very reasonable.

Authority is requested, based upon the occupant's moving reimbursement certification claim and paid bill, to pay the amount of $1,178.45 to Georgina Krueger as reimbursement of her actual moving cost for the relocation of her household personal property. (January 22, 1971)

Right of Way - Route 18 Freeway

85 There is presented here the matter of the proposed settlement in the condemnation of property on Route 18 Freeway, Section 8, Parcel 63, owned by Roger McHose; et al.

This parcel is a partial taking consisting of a strip of land from the entire frontage measuring 100'± and a depth of 16-1/2'± containing 0.038 Acres ±. Within the taking are improvements valued at $285. Remaining to the owner will be 0.503 Acres ± of land and the balance of the improvements. The registered fair market value is in the amount of $1600. The property owner originally demanded $2500 but has informed Mr. Harvey Winant, condemnation coordinator, that a settlement of $2,000 would be acceptable. An agreement was reached with the property owner for a similar taking on the adjoining parcel, Route 18 Freeway, Section 8, Parcel 64. This was a taking of a strip consisting of 0.028 acres containing improvements valued at $100, leaving a remainder of 0.512 acres. On the basis of this settlement, which is admissible into evidence under Ross v. Commissioner Palisades Interstate Park, 90 N.J.L. 461 (Sup. Ct. 1917), the property owner is entitled to $2,000.

It is, therefore, recommended that the settlement in the amount of $2,000 be approved. (February 2, 1971)

Due to the meadowland riparian litigation and legislation, the affected properties were, in effect, unmarketable and legal direction resulted in condemnation being instituted as one massive suit covering the two parcels. All "claimants" as well as tenants and other interested parties totaling 92 were joined in the suit as defendants.

Subsequently, the Department of Environmental Protection (formerly the Department of Conservation and Economic Development) depicted a line it now claims as the limits of the riparian areas. This action abandoned the State's claim to a substantial section of the subject meadowland areas.

By an Order dated May 29, 1970, Superior Court Judge Trautwein directed the Department of Transportation to revise the initial suit so as to condemn by area of each individual owner and/or claimant. This involved 31 new parcels. The Order also required that new appraisals based on the new tideland claimant conditions be accomplished.

One of the designated new tideland parcels owned by the Department of Environmental Protection and claimed by Leona Brochin, et al, is Parcel T2R100A9B. This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $15,500.00.

It is therefore recommended that authority be granted to amend the Complaint in compliance with the philosophy of the Order of the Court and that the additional sum of $100.00 be deposited with the Clerk of the Superior Court, which when added to the sum of $15,400.00 already deposited therein will equal the registered Fair Market Value of $15,500.00. This involved 31 new parcels. The Order also required that new appraisals based on the new tideland claimant conditions be accomplished.

One of the designated new tideland parcels owned by the Department of Environmental Protection and claimed by Borough of East Rutherford is Parcel T2R100B3. This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $39,100.00.

It is therefore recommended that authority be granted to amend the Complaint in compliance with the philosophy of the Order of the Court and that the additional sum of $22,345.00 be deposited with the Clerk of the Superior Court, which when added to the sum of $16,755.00 already deposited therein will equal the registered Fair Market Value of $39,100.00. **(February 3, 1971)**

69 **Right of Way - Route 3**

There is presented again the matter of acquisition of property on Route 3, Section 3, Federal-aid Project U-186-(18), Passaic River to Route 20, Parcels RT100A and RT100B, The Council in the Division of Resource Development of the Department of Conservation and Economic Development, in which condemnation proceedings were previously authorized on December 12, 1968, and on December 28, 1968 a Complaint was filed and a Declaration of Taking together with a deposit of $1,868,500.00 was made into Court.

Due to the meadowland riparian litigation and legislation, the affected properties were, in effect, unmarketable and legal direction resulted in condemnation being instituted as on massive suit covering the two parcels. All "claimants" as well as tenants and other interested parties totaling 92 were joined in the suit as defendants.

Subsequently, the Department of Enviromental Protection (formerly the Department of Conservation and Economic Development) depicted a line it now claims as the limits of the riparian areas. This action abandoned the State's claim to a substantial section of the subject meadowland areas.

By an Order dated May 29, 1970, Superior Court Judge Trautwein directed the Department of Transportation to revise the initial suit so as to condemn by area of each individual owner and/or claimant. This involved 31 new parcels. The Order also required that new appraisal based on the new tideland claimant conditions be accomplished.

One of the designated new tideland parcels owned by the Department of Environmental Protection and claimed by New Jersey Turnpike Authority is Parcel T2R100A12. This parcel has been re-appraised and a Fair Market Value has been registered in the amount of $3,200.00.

85 There is presented again the matter of condemnation of property on Route 35 (1953), Section 6, Asbury Avenue To Eatontown, Parcel 22, formerly owned by Art-Pat, Inc., now owned by the Monjer Corporation (a N.J. Corp.).

The Commissioner, by action dated February 26, 1970, approved the institution of condemnation proceedings for the acquisition of this parcel as the owner's agent would not accept the State's offer of $12,000 and the fair market value determination in this sum was subsequently deposited in the Superior Court.

Prior to the date that a condemnation complaint was filed on July 14, 1970, the property was conveyed by Art-Pat, Inc., to the Monjer Corporation through a sheriff's sale. The new owner demolished all of the improvements on the property, consisting of a motel complex in very poor condition. The removal of all the improvements was also effected prior to the date of the filing of the complaint. The State's appraiser was subsequently requested to update his report to the date of the filing of the complaint; however, due to the fact that the property consisted only of vacant land as of the complaint date the fair market value decreased to $3,900.

Authority is, therefore, requested to withdraw the sum of $8,100 leaving a balance on deposit in the Superior Court of $3,900 which will represent the re-registered value. (February 3, 1971)

The owner complied with the State's regulations in that he purchased and occupied decent, safe, and sanitary housing within a period of one year and submitted the required application for supplementary payment. The State's representative inspected the housing on January 11, 1971, and certified that the replacement housing is decent, safe, and sanitary.

Authority is requested to pay the replacement housing bonus in the amount of $1,200. (February 3, 1971)

Right of Way - Route 37 Freeway

There is presented again the matter of condemnation of property on Route 37 Freeway, Section 1, From U. S. 206 To New Jersey Turnpike, Parcel 94 plus remnant, Joseph F. Morello and Joseph Samarone, a partnership.

Subsequently, an appraisal updating to the date of complaint resulted in the Fair Market Value being re-registered in the amount of $75,300 which was offered to and refused by the owners who would not state a demand.

Authority is requested to deposit an additional $2,800 with the court which when added to the amount of $72,500 previously authorized for deposit will equal the re-registered Fair Market Value of $75,300. There has been no deposit made to date since possession has not been required. (February 3, 1971)

88

Right of Way - Route 37 Freeway

There is presented again the matter of condemnation of property on Route 37 Freeway, Section 4, From Monmouth Road (County Route 537) to Garden State Thruway, Ocean Val, Inc., a New Jersey Corporation. Condemnation proceedings were previously authorized for Parcels 1A, R1B, R4C on June 20, 1968.

Subsequently, the engineers effected a revision and the parcels became designated as R1A, R1B, R4C. Condemnation proceedings for these parcels were authorized on April 6, 1970.

The Title Bureau subsequently recommended that our engineers revert the parcels back to 1A, R1B, R4C, as the owner had made several conveyances which would necessitate that Parcel R1A be sub-divided if retained. In order to avoid a sub-division at this time, the engineers agreed to the recommendation of the Title Bureau and transmitted maps reverting the parcels back to 1A, R1B, R4C.

Inasmuch as the complaint on file has not been amended for Parcel R1A, it is correct as it stands. It is recommended that authority be granted to rescind the authorization of condemnation proceedings for Parcels R1A, R1B, R4C and to continue the condemnation proceedings previously authorized for Parcels 1A, R1B, R4C. The State's re-registered fair market value of $41,400. for re-instated Parcels 1A, R1B, R4C has been offered to and refused by the owners, who refused to state a demand. (February 3, 1971)

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $78,800.

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel in fee simple, subject to any public utilities existing in the premises. The State's registered Fair Market Value determination of $2,300 was offered to and accepted by the owners, however, agent cannot complete negotiations at this time.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the Taking of possession and use thereof by the Department of Transportation, authority is requested to then file a Declaration of Taking and to deposit with the Superior Court $2,300. (February 3, 1971)

91

Right of Way - Route 75 Freeway

There is presented again the matter of condemnation of property on Route 75 Freeway, Section 3, Federal-aid Project U-211-(5), 13th Avenue to Route 280, Parcel 421, Four Realty Company, a New Jersey Corporation.

On September 4, 1970 the Commissioner approved the institution of condemnation proceedings for the acquisition of this parcel based upon a hardship that the owner claimed. Authority was also granted to deposit in the Superior Court the State's registered fair market value of $13,000. This sum has not yet been deposited due to the fact that no construction is scheduled in this area in the immediate future.

On September 23, 1970 a complaint was filed and the State's appraiser was requested to up-date his appraisal to the date of the filing of the complaint. The original fair market value had been registered on September 28, 1969. In the intervening time the building had burned and had been subject to extensive vandalism and is now considered valueless by the State's appraiser. The re-registered fair market value as of the filing of the complaint on September 23, 1970 has therefore been reduced to $2,500.

Authority is therefore requested to amend the Commission Action of September 4, 1970 to the effect that authority be granted to deposit only the sum of $2,500 as the State's registered fair market value. (February 3, 1971)

92

Right of Way - Route 76

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel in fee simple, subject to any public utilities existing in the premises due to the inability of securing all signatures on the agreement of the parties involved.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $1,100. (February 3, 1971)

The owners complied with the State's regulations in that they purchased and occupied decent, safe and sanitary housing in the required time and submitted the necessary application for supplementary payment. The State's representative inspected the housing on January 20, 1971, and certified that the replacement housing is decent, safe and sanitary.

Authority is requested to pay the replacement housing bonus in the amount of $5,000. (February 3, 1971)

This parcel was appraised and the Reviewer's registered Fair Market Value determination is $1,350.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Department of Transportation, authority is requested to then file a declaration of taking and to deposit with the court $1,350.

It is further recommended that authority be granted to enter upon owners' remaining lands to remove the garage which lies partly within and partly outside the proposed right-of-way. Upon taking of possession, authority is requested to dispose of the garage to the road contractor, at public auction, or by sealed bids. (February 3, 1971)

Administration Items

Project Agreement - U-186(18)
Route 3, Section 3

1 It is requested that the attached modified project agreement in quadruplicate be approved and executed for Right of Way to N. J. Project U-186(18) Route 3, Section 3.

The total modified estimated cost is $10,500,000.00 of which $4,625,000.00 is Federal Aid Urban Funds and $5,875,000.00 is State Funds, $1,250,000.00 of New Jersey Turnpike cost is included in State Funds, which is eligible for reimbursement from New Jersey Turnpike. (February 8, 1971)

Project Agreement - F-204(14)
Route 24

2 It is recommended that the attached modified project agreement forms in quadruplicate be approved and executed for Preliminary Engineering for N. J. Project F-204(14).

The total estimated cost of $62,500.00 of which $31,250.00 was Primary funds will be released for reprogramming. This action is in accordance with Mr. Schonwald's correspondence of January 16, 1969, advising of the deletion of Route 24 Interchange cost apportionments from N. J. I-287-2(9) project, thereby requiring no necessity for the Primary funding. (February 8, 1971)

Claims - Settlement

3 The Department of Transportation is carrying a claim against the above named debtors in the amount of $297.42 arising out of an accident occurring on January 7, 1969 in the Township of Cinnaminson, involving vehicles owned and operated by Frank Hartshorne, William Voss and Imco, Inc. As the result of said accident, traffic signal equipment was damaged and had to be repaired at a cost of $297.42. All efforts to collect this claim proved unsuccessful and the Claims Bureau therefore instituted a District Court action against the owners and operators of the vehicles involved.

Subsequent to filing our suit, an offer of settlement was made to settle the case without litigation for the sum of $225.00. Discussion with our counsel resulted in the offer of settlement being accepted for the reason that it would cost us more to produce the necessary witnesses in court to prove this case than the remaining portion of our claim amounting to $72.42.

It is therefore our recommendation that the offer of settlement in the amount of $225.00 be approved and the balance of this claim in the amount of $72.42 be cancelled in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of David A. Biederman, Deputy Attorney General. (February 11, 1971)

While there may be two technical grounds for appeal in this matter, an appeal is not recommended. This matter has been reviewed by the Assistant Attorney General in charge of Appeals, Stephen L. Skillman, and by the First Assistant Attorney General, Marilyn L. Schauer. Both concur with Mr. David A. Biederman since the Federal Government has finally concurred in our view as to

what existing State law holds on the doctrine of general benefits. The trial court, in the instant case, applied that doctrine correctly. The verdict obtained by our trial attorney was a good one, in view of the fact that it was $21,500 under the commissioners' award. While the jury did compromise its verdict, it obviously gave prevailing weight to the State's testimony since the owner's values exceed close to $500,000. Another jury may not show the same good judgment.

This acquisition is part of the City of Newark water shed area and the State entered on the property in 1952. At the time of entry there were a number of buildings on the property which have since been removed but were not considered in the appraisals. In the event this matter was to proceed to a hearing and/or trial, updated appraisals would be required which would no doubt reflect higher values. The interest, if allowed from the date of entry, would exceed the settlement. For the above reasons the settlement would appear in the best interest of the State and approval is recommended. Since this is a single family, owner occupied dwelling, the rent to be charged was based on a rental factor of 10% of the acquisition price, which was $9,000. Consideration was also given to the fact that the occupant will be responsible for the general appearance and security of the building as well as the lesser neighborhood amenities of the subject property due to vacant lots and other conditions caused by highway acquisition.
